

Product Features

- Type II PC Card with Internal Fingerprint Reader
- Includes BioLogon Client application

- Easy to Install and Use
- Integrated with Microsoft Network Security Architecture

PC Card Fingerprint Reader

Logon to your laptop with a touch of your finger. The BioTouch PC Card Fingerprint Reader is a break-through in security and convenience for PC laptop users. Now, inside a single type II PC card, you get a fully functional optical fingerprint reader. Just press the side of the PC card and out slides the fingerprint reader. Place your finger on the reader to authenticate, and press it back in—its that simple! Never before has so much security been packaged into such a compact and robust device. BioTouch is a leap forward in fingerprint imaging technology—a state-of-the-art solution.

BioTouch comes with the award-winning BioLogon Client for Windows software, which allows you to control who accesses your laptop. If you need network security, the BioLogon software can easily be configured to logon to any Windows NT domain with BioLogon Server for Windows (purchased separately).
